(FOR KEY SEE REVERSE)

50X1-HUM

836 tons of kerosene consigned for Durres.¹

2. A small quantity of kerosene was obtained for analysis. Although the sample was too small to permit a detailed analysis, it was established that this shipment of kerosene was of a high quality and could be used for aviation purposes as well as household fuel. The color was brownish yellow and not the result of natural impurities. It is suspected, therefore, that the color is due to an additive compound.
